- ✓ Clearly improved immunity
- ✓ Less disposition to MMA and much better heat periode
- ✓ More healthy animals = Less mortality
- ✓ Better fertility
- ✓ Higher lactation performance and more vitality
- ✓ Better health – less piglet mortality

The Concept

- APC natural additive blends consist from a mixture of special clay minerals with synergistic effects.
- We achieve high effects by special physical processing and by that a much better utilization of all nutrients.
- **Additional APC Z/ZI 0,2% includes a special combination of herbs and ethereal oils.** This combination increases the immunity. The animals are clearly healthier and more resistant to diseases
- By using APC Z/ZI 0,2% we can reduce input of protein and minerals in the formulas and that leads to the relief of the metabolism
- Additionally, through the lower input of N and P, we achieve a strong reduction of ammoniac and bad gases in the air, up to 50 %

Usage 2 kg for 1.000 kg ready feed for **pregnant and suckling sows**

Consulting and least cost optimization of the ready feed with APC Z/ZI 0,2% you will get from us directly or from our distributors.

package

30 kg bag or Big Bag

stability

6 months by original closed package
